

## **Introduction of clip on hose - Statement**

**October 10, 2016**

Groupe Renault is committed to total customer satisfaction, having robust processes in place to ensure safety, quality and performance of its products.

In line with our high standards of product quality, Renault India is conducting a pre-emptive and voluntary inspection of select 0.8 L variants of Renault KWID that were produced up to 18th May 2016.

As a proactive measure, a fuel hose clip will be added to these select cars along with the evaluation of overall functionality of the fuel system to mitigate any potential disruption of fuel supply.

We will inspect these cars without any cost to the customers and carry out necessary measures, if required.

We are in the process of contacting customers, requesting them to come to dealerships to get their cars inspected.
